

cifX PC Card Bundles

for Siemens SIMATIC IPC

- Connect SIMATIC IPCs to all industrial communication networks with cifX M.2 PC cards
- Master & Slave capabilities
- Address heterogeneous communication landscapes and flexible use-cases
- Unique drivers, tools and API for all networks
- Simplified plug & mount integration through standardized front plates

Fieldbus

Real-Time Ethernet

Multiprotocol connectivity for your Siemens SIMATIC IPCs

Today's world of industrial automation is characterized by a very heterogeneous communication landscape. This results in machines and production systems being connected via different network standards, which presents a major challenge.

The cooperation between Siemens and Hilscher provides users of SIMATIC IPCs with flexible access to all common fieldbus and Real-Time Ethernet systems. This enables them to respond to complex requirements across all industries and applications.

The integration of the additional network interface is very simple: Hilscher and Siemens offer a bundle consisting

of a cifX PC Card in a compact M.2 format and a suitable front panel for the box or panel PC. This simplifies integration for the user down to merely plugging it in and tightening screws.

The cifX PC Cards are based on Hilscher's own netX chip technology. It enables the integration of all relevant fieldbus and Real-Time Ethernet networks with only one hardware platform. Users benefit from unified device drivers, a configuration tool and a universal API across all protocols.

With this scalable platform, users can integrate all common automation protocols into their applications — both as controllers and as devices.

Product Information

Order Information

PC card bundles		
CIFX M3042100BM-RE\ET\F\SIEM	9385.700	Real-Time Ethernet Slave
CIFX M3042100BM-DP\ET\F\SIEM	9385.701	PROFIBUS-DP Slave
CIFX M3042100BM-CO\ET\F\SIEM	9385.702	CANopen Slave
CIFX M3042100BM-DN\ET\F\SIEM	9385.703	DeviceNet Slave
CIFX M3042100BM-RE\ET\F\SIEM/+ML	9385.700/+ML	Real-Time Ethernet incl. Master license
CIFX M3042100BM-DP\ET\F\SIEM/+ML	9385.701/+ML	PROFIBUS-DP Master incl. Master license
CIFX M3042100BM-CO\ET\F\SIEM/+ML	9385.702/+ML	CANopen Master incl. Master license
CIFX M3042100BM-DN\ET\F\SIEM/+ML	9385.703/+ML	DeviceNet Master incl. Master license

Choose the protocol you need:

All product bundles consist of a M.2 3042 Key B+M PC card and the appropriate network interface with cabling. The required front plate is included and already premounted.

Sample kit		
CIFX M3042100BM\SIEM SAMPLEKIT	9385.705	Sample kit for cifX M.2 3042 Key B+M and one Network Interface of each type with respective premounted frontplates
CIFX M3042100BM\SIEM SAMPLEKIT/+ML	9385.705/+ML	Sample kit for cifX M.2 3042 Key B+M and one Network Interface of each type with respective premounted frontplates incl. Master license

Get the complete cifX sample kit your your SIMATIC IPC:

The sample kit encompasses a cifX M.2 3042 Key B+M PC card as well as one of each network interface with cabling. The respective front plates for each network interface are included and premounted as well.

Available for SIMATIC IPC*	
SIMATIC IPC227G	6ES7647-8C...-....
SIMATIC IPC277G	6AV7886-0....-....
SIMATIC IPC277G PRO	6AV7886-1....-....
SIMATIC IPC327G	6AG4022-0B...-....
