The cifX PC card family is the unified standard supporting all Real-Time Ethernet and Fieldbus systems for PC based automation.

The protocol stack is executed autonomously on the PC card and process data exchange with the host is done via Dual-Port-Memory or DMA (Direct Memory Access). Thanks to the common Hilscher Platform Strategy all PC cards use the same drivers and tools - independent of protocol and card format. Thanks to the netX technology there is exactly one hardware needed for the realization of all Real-Time Ethernet protocols. A change of the communication protocol is done by just loading a different firmware.

Always the right solution! Different cable lengths, M-12 connectors, additional NVRAM, extended temperature range, 2-channel cards or detached network interfaces – numerous hardware options always offer the right solution for your application. On top, a wide range of device drivers and a C-Toolkit, free of charge, are available.

The PC based automation is evolving and the Hilscher cifX PC card family keeps the pace. With continuous expansion for new standards, protocols and formats, as M.2, mini PCIe halfsize or CC-Link IE Field, customers are always prepared for new market demands.
MOST FLEXIBLE PC CARD PORTFOLIO ON THE MARKET – cifX

Card formats

PC/104
-20 ... +70°C
+3,3 V / typ. 650 mA
95,0 x 91,0 x 24,0 mm

PCI-104
-20 ... +70°C
+3,3 V / typ. 650 mA
95,0 x 91,0 x 24,0 mm

PCI
-20 ... +70°C
+3,3 V / typ. 650 mA
120,0 x 86,0 x 18,5 mm

Compact PCI
-20 ... +70°C
+3,3 V / typ. 650 mA
162,5 x 100,0 x 20,0 mm

Mini PCI
-20 ... +70°C
+3,3 V / typ. 650 mA
60,0 x 45,0 x 9,5 mm

PCI Express
-20 ... +55°C, -20 ... +70°C
+3,3 V / typ. 800 mA
120,0 x 86,0 x 18,5 mm

Low Profile PCI Express
-20 ... +65°C
+3,3 V / typ. 800 mA
119,0 x 69,0 x 18,5 mm

Mini PCI Express
-20 ... +55°C, -20 ... +70°C
+3,3 V / typ. 800 mA
51,0 x 30,2 x 11,0 mm

Mini PCIe halfsize
-20 ... +70°C
+3,3 V / typ. 330 mA
26,8 x 30,0 x 7,2 mm

M.2
-20 ... +70°C
+3,3 V / typ. 330 mA
30,0 x 22,0 x 7,0 mm

Hardware-Options

- **Extended temperature**
  For the usage in high temperature environments, all cifX cards support an extended temperature range

- **Additional NVRAM**
  Mini PCI Express and Low Profile PCI Express types can be ordered with an additional NVRAM for 128 kByte remanent data

- **Rotary Switch**
  A rotary switch on PCI, PCI Express and Low Profile PCI Express cards allows an easy and reliable slot assignment

- **2-Channel Cards**
  For compact systems with limited internal slots, 2-channel cards are available

Platform Strategy

Same API, same driver, same tools for all card formats & protocols

Detached network interface

• **AIFX-RE with RJ45 connectors**
  PCI-104, PC/104, mini PCI, mini PCI Express, mini PCIe halfsize and M.2 cards come with a detached network interface, which is equipped with RJ45 connectors

• **AIFX-RE\M12 with M12 connectors**
  Alternatively, all cards with a detached Real-Time Ethernet network interface are available with D-coded M12 connectors

• **Different cable lengths**
  For flexible mounting the detached network interface can be delivered with cable lengths of 15 or 20cm for Real-Time Ethernet and 15 or 30cm for Fieldbus
UNIQUE DIVERSITY & SIMPLICITY – FOR ALL USE-CASES

Universal PC card for Master & Slave

Hilscher’s PC cards cifX are based on the multiprotocol chip netX 100 and are designed as so-called universal cards. Means the same card can be used as Master or as Slave, respectively. One hardware supports all Real-Time Ethernet systems – all using the same application interface. A change of functionality is done by just loading an appropriate firmware and adding a software license for master functionality.

Dedicated PC cards, as for CC-Link IE Field or netX 90 based cards, are designed for Slave functionality only.

Real-Time Ethernet & Fieldbus protocols

As specialist for industrial communication Hilscher offers the largest selection of protocols used in the factory automation.

Besides traditional Fieldbusses, all major Real-Time Ethernet protocols are available as Master or Slave.

Device Drivers

For a quick and easy integration Hilscher offers a wide range of device drivers. Besides a C-Toolkit free of charge, drivers for all relevant operating systems, as well as softPLC drivers from 3rd party suppliers, are available.

AREAS OF USE

- Plant control or local machine control
- Independent of the IPC – all formats and protocols as Master & Slave
- Same API and drivers for all cards
- Monitoring and machine operation
- One hardware for all Real-Time Ethernet systems
- Wide range of device drivers
- For small & compact systems, e.g. smart cameras
- Cards for extended temperature range
- Smallest multiprotocol PC card on the automation market
### WHAT’S NEW?

**cifX M.2 & mini PCIe halfsize**
- Smallest multiprotocol PC cards on the automation market
- For small & compact systems with a size of 22x30 mm or 30x26,8 mm
- Optimized for extended temperature and smallest footprint
- One hardware for all Real-Time Ethernet Slave protocols

**cifX 4000**
- High-Performance PC card for Real-Time Ethernet as Master & Slave and IoT
- Increased performance for big amounts of I/O data
- One hardware for all Real-Time Ethernet Master & Slave protocols

**AIFX-RE\M12**
- For high protection in harsh environments
- Ratings up to IP67 in customer designs
- Available for all Real-Time Ethernet types with detached network interfaces

1) Master only  
2) Slave only  
3) also MPI  
4) 2-Channel card available in following combinations: 2ASIM, 2DP, 2CO, 2DN, 2DP\CO, 2DP\DN, 2CO\DN  
5) Coming soon (2020)
## PRODUCT INFORMATION

### TECHNICAL DATA

**Scope of delivery**
A complete software package is always included in the scope of delivery. This package consists of one FDT-based configuration tool (IEC standard) for all products and networks, loadable firmware, documentation and a driver toolkit. Numerous drivers for different operating systems are also available.

**Configuration**
- One tool for all products and automation networks
- Configuration of Master and Slave
- Based on common FDT / DTM standards
- Including topology editor for PROFINET I/O IRT Controller
- Graphical and intuitive configuration tool for a simple and fast commissioning
